**INCLUDES ALL ALLERGENS OF RESPIRATORY,
FOOD & MISCELLANEOUS PROFILES.**

- ✓ 4th Generation allergy testing technology.
 - ✓ Based on microarray and nanotechnology.
 - ✓ Provides information about proteins/components of various allergens.
 - ✓ Predicts severity of the allergic reaction.
 - ✓ Predicts the probability of immunotherapeutic success.
 - ✓ Discriminates allergens susceptible to denaturation (heat sensitive) and digestion.
 - ✓ Preventing cross-reactivity and false positives.
 - ✓ In children, it predicts the likelihood of developing tolerance.
- 💡 Interpretation of test results provided by an **AI-driven algorithm along with the report.**
